

JENNIFER NI

Cell Phone: (415) 963-1517 Email: Jennifer.Ni0924@gmail.com

Education

University of California Berkeley
Full Stack Web Development Bootcamp

Sept 2019 - Mar 2020

San Jose State University
B.S. in Electrical Engineering with a minor in Computer Science

Aug 2016-Dec 2019
San Jose, CA

Projects

"My Amazon"

Dec 2019

Using mySQL, I created a database for a customer and manager interface using Javascript and Node.js. The customer interface can view and purchase multiple items while the manager interface can view and restock items.

"Friend Finder"

Dec 2019

Deployed an application on Heroku to match you with a friend based on a simple survey.

"Liri-node app"

Dec 2019

Using a few APIs, I created an app that gives the user options to search for songs, artists or bands using node.js.

Programs Used: Javascript

"Brew Masters"

Nov 2019

For the Beer, Whiskey, Sake, and Wine lovers, a team comprised of four people have built a brewery search engine using different APIs that can also search for any place with whiskey, sake and wine in any city you desire. Please enjoy our yelp inspired page for alcohol!

Programs Used: Javascript, CSS, HTML

"Hangman"

Sept 2019

A game of hangman using HTML, CSS and Javascript. It includes three categories: games, Disney movies and Pixar movies in which the player must guess the word using letters pressed before a certain amount of mistake guesses.

"Rock, Paper, Scissors game"

June 2018

I created a program that allows the player to play a game against the computer. The results are recorded and a betting system was added using virtual money.
